DIWAKAR SHARMA

Full Stack Developer
Surat, Gujarat, India | diwakarsharma2216@gmail.com | +91 6394842216
Portfolio | GitHub

Professional Summary

Full Stack Engineer with 3 years of experience building and shipping web applications across e-commerce, booking, and education platforms using Next.js, React, Node.js, and TypeScript. Built Stripe payment flows that keep orders and payments in sync even when something fails, and shipped a headless CMS that removed about 15 weekly developer requests from a six-person content team. Trusted to own features end to end: scoping the work, dividing it across teammates, and delivering it reliably. Good in performance optimization, Redis caching, and scalable API design.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, C/C++
Frontend: React.js, Next.js, Redux Toolkit, Context API, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, JWT, RBAC, Socket.IO, BullMQ, Sharp
Databases & Search: MongoDB, PostgreSQL, Redis, Firebase, Typesense
Cloud & DevOps: Docker, AWS (EC2, S3), Cloudflare R2, DigitalOcean, Git, GitHub Actions, CI/CD, Linux
Commerce & Analytics: Stripe, Razorpay, PostHog, MetaPixel, Technical SEO

Work Experience

Software Developer – Diamond Atelier **Nov 2025 – Present**
Surat, Gujarat, India (Onsite)

- Optimized product-listing build performance by 4x (52s to 13s) through PostgreSQL query filtering, pricing computation improvements, and shared in-flight builds; implemented Redis caching to reduce cached response times to 200–300ms.
- Engineered a unified Product API that dynamically calculates pricing based on carat, shape, and metal configurations, constructs product image URLs, and delivers product details, variants, and specifications in a single response, reducing frontend API calls and simplifying product-page data handling.
- Implemented Stripe payment workflows with secure webhook verification to handle successful, pending, and failed payments, automatically update order statuses, and trigger rollback and recovery processes to maintain payment and order consistency.
- Architected a headless CMS enabling a six-person content team to independently manage website media and catalog content, eliminating approximately 15 weekly developer image-change requests.

MERN Stack Developer – Empiric Infotech LLP **Apr 2024 – Oct 2025**
Surat, Gujarat, India (Onsite)

- Engineered appointment-booking REST APIs using Node.js, Express.js, and MongoDB, implementing atomic slot reservations to prevent double-booking across multiple provider schedules.
- Integrated the WAHA WhatsApp API into business workflows to automate appointment confirmations, schedule-change notifications, and staff reminders.
- Implemented Stripe checkout and automated refund workflows with idempotent webhook handling and receipt generation, streamlining payment recovery and customer dispute resolution.
- Developed an admin-controlled task management module with role-based access control, enabling administrators to manage tasks and control developer-level permissions.

Associate Instructor & Mern Developer – Masai School **Oct 2023 – Mar 2024**
Bengaluru, Karnataka, India (Remote)

- Developed a student assessment and code-review module using React.js and Node.js, centralizing submission reviews, rubric-based scoring, and feedback management across cohorts of 200+ students.
- Built and maintained LMS features for assignment submissions, student progress tracking, and structured feedback workflows, improving assessment management for instructors.
- Mentored 200+ students in JavaScript, React.js, Node.js, and REST API development, covering frontend and backend engineering fundamentals.
- Conducted 50+ mock full-stack technical interviews, evaluating coding skills and providing structured feedback to improve developer-role readiness.

Education

Manipal University Jaipur **2023 – 2026**
Bachelor of Computer Applications (BCA)
Relevant Coursework: DSA, OOP (C++, Java), Python, DBMS, Operating Systems, Computer Networks.

Masai School **Sep 2022 – Jun 2023**
Full Stack Web Development (NSDC Certified)
Coursework: DSA, React.js, Redux, Node.js.

Mahatma Gandhi Inter College **Mar 2021 – Apr 2022**
Class XII – Science
